PERSONAL SUMMARY

Experienced **Front-end Developer** with 5+ years of expertise in **React.js**, **JavaScript**, and **TypeScript**, crafting dynamic web applications. Skilled in transforming designs into responsive, user-friendly interfaces. Strong collaborator with a focus on clean code, creative problem-solving, and staying updated with industry trends.

SKILLS

- React.js
- Next.js
- Redux
- TypeScript
- JavaScript
- Node.js
- HTML
- CSS
- BootStrap
- Tailwind CSS
- Jest
- Git
- Postman
- AWS

EXPERIENCE

08/2024 - Current

Senior Software Engineer

Apexon - Mumbai

- Developed **insurance portals** incorporating Next.js, Tailwind CSS, and **microfrontend architecture**.
- Resolved critical bugs and implemented feature enhancements to maintain smooth application functionality.
- Collaborated with UI/UX designers to implement mobile-first, responsive designs, ensuring seamless onboarding and intuitive interfaces.
- Worked with testers to resolve issues, enhance features, and maintain smooth application functionality.

01/2024 - 08/2024

Senior Software Engineer

Tech Mahindra - Mumbai

- Developed and maintained a dynamic single-page application for a **telecom project** using Next.js, improving user experience and performance.
- Implemented a **mono-repo structure** to enhance code reuse, streamline project management, and ensure consistency across telecom applications.
- Optimized application performance and **accessibility**, ensuring seamless functionality across devices, and improving user engagement.
- Conducted code reviews, mentored junior developers, and prioritized security measures to safeguard telecom data and maintain a high-performing team.

08/2022 - 01/2024

Front-End Developer

Amazatic Solutions - Pune

- Developed a dynamic **horse racing betting application** using React.js and Next.js, leveraging server-side rendering for performance and scalability.
- Designed and implemented core features, including **payout range previews**, the **Pace Projector for race visualization**, and **user betting logic** integrated with Redux.
- Enhanced website security by integrating **Google reCAPTCHA** during security attacks and optimizing debugging with **LogRocket** for log analysis.
- Led frontend development of key components, such as **race cards** and **betting forms**, ensuring a seamless user experience and efficient data management with Redux.
- Played a central role in release management, coordinating feature implementation, managing Bamboo builds, and contributing to sprint planning, design reviews, and documentation.

08/2019 - 05/2022

Software Engineer

Capgemini - Mumbai

- Developed key features for a **back-office bank application**, enabling beneficiary management, vendor payments, and data visualization.
- Designed and implemented the **Beneficiary Add module** using React, creating an intuitive interface for efficient onboarding.
- Enhanced application state management with Redux, ensuring data consistency and seamless component interactions.
- Conducted thorough testing with Jest and contributed to documentation, ensuring reliability, maintainability, and ease of adoption.

EDUCATION

06/2019

Bachelor of Science: Computer Science

SIES College of Arts, Science & Commerce - Navi Mumbai

CERTIFICATIONS

- Edureka Full Stack Web Development Internship Program
- Coursera Front-End Development with React

ACADEMIC PROJECTS

- **Food Find** - It is a restaurant search and review platform with features like location tracking, secure payments, and customized sorting and filtering
- **Surya News** - It is an app to explore global news stories, neatly categorized for easy navigation, with a dark/light theme switch and seamless scrolling for enhanced user experience.

EXTRACURRICULAR ACTIVITIES

As a member of the **Rotaract Club** at New Bombay Seaside, I helped organize cleanliness drives, fundraisers, and supported disability assistance programs to make a positive impact in the community.
